COMPUTER ACCESSIBILITY TRAINING HIGHLIGHTS TOOLS YOU HAVE BUT MAY NOT KNOW ABOUT

March 24, 2011 by admin

The Utah Assistive Technology Program (UATP) will present a FREE online interactive training on Wednesday, April 6, 2011 from 3:00 – 4:30 p.m. Scott Baggaley, from The Computer Center for Citizens with Disabilities, will present: Accessibility options for Mac, Windows and other computers.

This free training is intended to allow people to learn about the tools they already have, but may not know about. It is a review of the accessibility options within your computer. We will review the different features of Windows 7, Mac OS X, as well as older PC operating systems. The Computer Center is a Microsoft Accessibility Resource Center and has an emphasis on keeping costs down wherever possible. Looking at the tools that a user already has on hand can be important for individuals seeking to quickly and effectively access technology.

Scott Baggaley has been working as an Education Program Specialist at the Computer Center for Citizens with Disabilities at the Utah Center for Assistive Technology for the past 8 years. He specializes in Computer Access, Augmentative Communication, and Educational Software.

In order to participate, you will need a computer with high-speed internet access. If you are interested in participating please RSVP to Storee Powell. She will email you the participant instructions.

If you are a screen reader user please contact Sachin Pavithran no later than Friday, April 1, to make arrangements to participate via phone. If you need any other accommodations in order to participate in the training please let Sachin know no later than Friday, April 1st.

Please feel free to pass on this information to anyone that you think might be interested.
